

Restriction of Hazardous Substances (RoHS) Compliance Statement

Declaration of Compliance to EU Directives 2002/95/EC, 2011/65/EU and 2015/863/EU on the Restriction of the Use of Certain Hazardous Substances (RoHS) in Electrical and Electronic Equipment

To whom it may concern,

On our sole responsibility, Multitone Electronics plc hereby declares that all of the products supplied by us, comply with requirements of the EU Directives 2002/95/EC (RoHS), 2011/65/EU (RoHS 2) and 2015/863/EU (RoHS 3) and contain no more than the agreed levels of: -

Lead (Pb); Mercury (Hg); Cadmium (Cd); Hexavalent chromium (Cr6+); Polybrominated biphenyls (PBB); Polybrominated diphenyl ether (PBDE); Bis(2-ethylhexyl) phthalate (DEHP); Butyl benzyl phthalate (BBP); Dibutyl phthalate (DBP) and Diisobutyl phthalate (DIBP).

DEHP, BBP, DBP and DIBP were added as part of Directive 2015/863EU, published on 31 March 2015, which came into force as the new RoHS 3 directive (2015/863) on 22nd July 2019.

Multitone is committed to protecting people and the environment and we are continually working on identifying any materials used in our processes that could pose a potential hazard to our employees, customers or the environment.

In 2004, Multitone began the process of converting all of its products to be built without any of the banned materials. The qualification of RoHS-compliant components supplied by our vendors and the implementation of any new manufacturing processes related to these Directives, now ensures that all of Multitone's products and their packaging materials sold worldwide, are fully RoHS compliant.

The only exception to this will be certain legacy products which have been installed prior to the original 2005 Directive implementation date, but continue to receive support and for which RoHS-compliant components are unavailable from the suppliers.

Signed:

B.R. Merchant,
Principal Approvals Engineer,
Multitone Electronics plc
